

Declaration and Initialization Variable:

Program 1:

```
#include<stdio.h>

Int main()
{
//Declare variable
Int myName;
//Initialization variable
myName = 'Towhidul';
}
```

Program 2:

```
#include<stdio.h>

Int main()
{
//You can declare multiple variable in the same time
Int myName,othersName;
//Initialization variable
myName = 'Towhidul';
othersName= 'Asab';
}
```

```
#include<stdio.h>

Int main()
{
//You can declare and initialization in the same time
Int myName = 'Towhidul';
}
```
